

Leo Liu

Industrial & Visual Designer

EXPERIENCE

Breo

Industrial Designer
5, 2019 - 9, 2019 (Intern)

During my internship in Breo, I have learned a lot of product structure and manufacture. Everyday discussion with structural engineer and electrical engineer has equipped me with a overall understanding about influence of product appearance onto structure and material, while grasped many techniques about component processing and producing by visiting manufacturing workshop.

HONGHU Design Studio

Industrial & Visual Designer
2017 - 2019 (Part Time)

Providing solutions for product design, rendering, package etc. take up major part of my work. I have helped many newly established companies to set up product design language and human-computer interaction mode.

Practice makes perfect, through designing for several start-up products, it has helped me understanding relationships between designer and market, which let my know ideas and missions of many newly established companies. I firmly hold the thought of a good design means much for a brand, in another words, design could help in company transformation and improvement.

Getty Images & iStock

Contracted Photographer
2016 - 2020

Photography is one of my hobbies, thus signing with Getty Images, VCG has become my dream since beginning, which could help me collecting inspirations in daily life meanwhile energize my mind.
